

Institute for Governance, Policies & Politics (IGPP) is a think tank initiative of the Vivek Manthana Foundation (VMF), that conducts in-depth research and analysis on the issues of public policy. IGPP is inspired by intellectual rigour and a sense of accountability to innovate and propose practical solutions to issues associated with policy advocacy. It employs both qualitative and quantitative procedures for the purpose of providing research support and analysis for policy formulation, implementation and evaluation.

Emerging Technologies and AI : Governance and Policy Landscape

In the ever-evolving landscape of technological advancements, Artificial Intelligence (AI) has ushered in a paradigm shift across various sectors. This IGPP initiative seeks to address the need for a comprehensive approach to AI regulation while fostering innovation.

The image is a promotional poster for an online panel discussion. At the top right is the IGPP logo. The main title is 'Emerging Technologies and AI: Governance and Policy Landscape' in a light blue font. Below it, the text 'Online Panel Discussion' and 'Exploring India's AI Path: Present Pioneers, Future Frontiers' is displayed. Five circular portraits of the panelists are arranged horizontally. Below each portrait is the name and title of the panelist. At the bottom, a light blue bar contains the date 'Thursday, December 21, 2023', the time '04:00 PM', and the word 'Live'. Below this bar are social media handles for IGPP and its various initiatives.

The primary objective of this program is to bridge the gap between the dynamic realm of AI technology and the regulatory framework by deepening lawmakers' understanding of AI technologies. This will be achieved through a multifaceted approach focusing on awareness, collaboration, and innovation.

Published Report

The study aims to investigate the depth of awareness, perception, expectations, and regulatory preferences among Indian parliamentarians regarding Artificial Intelligence (AI). The study focuses on parliamentarians' understanding of AI as a technology and their attitudes toward its societal implications.

What Indian Parliamentarians Think of AI ?

AI & Your Electoral Fortune

IGPP launched the first-of-its-kind initiative ‘AI and Your Electoral Fortune,’ aimed at unravelling the intricate relationship between Artificial Intelligence (AI) and electoral processes.

The infographic features a central title 'AI & Your Electoral Fortune' in a large, bold, serif font. To the left, a sunburst icon is next to the text: 'IGPP's initiative to highlight how AI can impact your electoral fortunes And How you can stay ahead By utilising AI for your good While warding off threats'. To the right, a vertical bar labeled 'Program Components' lists three items: '1. Video Module' (with a play button icon), '2. 10-minute virtual session' (with a computer monitor icon), and '3. In-person engagements' (with a target icon). Below these is a box for 'Beneficiaries' stating 'Political candidates of all hues contesting upcoming Lok Sabha Elections!'. At the bottom, the slogan 'AI-Powered Elections. Your Strategy. Your Future' is displayed above a dark brown footer containing contact information and a QR code.

Testimonials

We connected to around **2000 candidates** cutting across regions, states and parties and conducted virtual sessions with **112 candidates**, discussing how they use AI in their campaigns and their perceptions of its impact.

A Candidate from Maharashtra

IGPP's awareness initiative is timely and particularly important for candidates and the Election Commission of India should adopt a similar initiative to ensure candidates understand how technology influences elections and their campaigns.....

It is important to transition from traditional voter outreach methods to AI-driven strategies, understanding practical aspects of AI and associated costs..... I think it's great that IGPP's initiative is helping candidates to be aware about AI's impact on elections and campaigns.....

A Candidate from Gujarat

Forthcoming Report

Team IGPP is evaluating AI's role in the 2024 elections through a two-part report. The first part covers January to June 2024 elections, detailing global AI use cases in elections. It includes real-world examples from candidates, political parties, and electoral bodies, showcasing AI's influence and diverse applications in electoral processes.

AI Special Series

AI Special Series Part of 'Emerging Technologies and AI: Governance and Policy Landscape,' this initiative focuses on creating awareness and fostering understanding of emerging technologies and AI. By engaging with experts on the subject matter, IGPP aims to debunk myths about AI technologies and contribute to effective policy-making.

Politics in the South of the Vindhyas

Politics in the South of the Vindhyas, a series of discussions, round tables, interviews, talks, etc, intends to foster dialogue on the political landscape of the states in the South of the Vindhyas. They are often overlooked in mainstream discussions, and hence, it is crucial to understand unique complexities, regional narratives and issues pertaining to states in the South of the Vindhyas. The discussion and interviews will have academicians, experts, journalists and field observers from different political hues and social milieu.

Bharat Pravah

“Rivers and Seas have deep connotations and connect with the social psyche, the ‘janmanas’ of Bharat.”

Director's Note

IGPP, founded in 2011, aims to combine years of hands-on experience in journalism, public policy and politics with in-depth research and analysis of ground realities in an effort to provide policymakers with innovative inputs that can really make a difference with an able, enthusiastic and young team of researchers and consultants.

IGPP has been able to transfer itself into a premier think tank with a focus on Social Dimensions of Digital Ecosystems, Media, Politics and Society, Health and Lifestyle in Modern Society, Energy, Environment and Climate Change and Livelihood and Natural Resources.

IGPP's core mission remains to bring policymakers closer to ground realities and assist them so as to formulate people-centric policies
